All about UltraShape Power®

At Minnesota Women's Care

What is UltraShape Power?

UltraShape Power is a body contouring procedure that uses ultrasound for fat cell destruction. It is the first and only FDA-cleared device of its type.

UltraShape Power is non-surgical and pain-free.

How does it work?

UltraShape Power delivers ultrasound energy directly into the stubborn fat below your skin's surface. The targeted fat cells rupture, releasing triglycerides that are processed by the liver and eliminated naturally.

Does it last?

Yes! UltraShape Power permanently destroys fat cells so the effects are long lasting. Of course, a healthy lifestyle is always essential to maintaining a healthy weight.

Is this like Coolsculpting?

No! Coolsculpting freezes fat cells—a procedure that is often painful. **UltraShape Power is painless** and leaves no visible signs of treatment. Plus, in FDA testing, UltraShape Power was proven to be far more effective than its predecessor and the competition. Here is the "Power" difference:

**UltraShape Power works.
The test results are clear!**

Technology/Product	% Fat Destruction*
UltraShape Power	32% (UltraShape Power)
1060 nm Laser	11% (SculpSure)
Cryolipolysis	22% (Coolsculpting)

* Measured by ultrasound for abdomen

Is UltraShape Power safe?

Yes! The UltraShape system has been shown to be safe and effective for patients. The newer UltraShape Power has also gone through rigid testing and has been determined to be safe.

- **Cleared for abdominal circumference reduction**
- **Clinically demonstrated in multi-center controlled trials**
- **10 peer-reviewed published articles and chapters**
- **300,000 treatments performed worldwide**

The event is free. To reserve your space, call us at 651-600-3035 or visit our Facebook page and click on the EventBrite link.
